Reset your Safety Switch

Keep this on your fridge

1.

Unplug
UNPLUG everything from your power points (don't just switch off).

2.

Find hidden power points
Remember things like your range hood, fridge, dishwasher, outdoor pumps & power points under desks or behind bookshelves.

3.

Reset your Safety Switch
Go to your switchboard & reset your Safety Switch by firmly pushing or turning it to the ON position.

4.

Plug in
Plug back in & switch on each of your appliances one by one. The power should trip off again when the faulty appliance is plugged in.

5.

Reset
Remove the faulty appliance and reset your Safety Switch to restore power.
